Summary

Driven by a passion for creating services that bring value to people, I aspire to propose and build technologies that make a meaningful impact. My primary interests lie in **education** and **large language models (LLMs)**. I am actively developing a versatile skill set grounded in interdisciplinary exploration, believing that this breadth will ultimately empower me to offer fresh and unique perspectives in future projects.

Education

Bachelor's degree, Computer Science

Daegu Gyeongbuk Institute of Science and Technology, Republic of Korea, Daegu
Enrolled in 2022, currently a third-year undergraduate, **GPA 3.76**

Winter semester exchange student, Department of Electrical and Computer Engineering

Seoul National University, Republic of Korea, Seoul
2023 winter, Introduction to Artificial Intelligence & Artificial Neural Network, **GPA 3.85**

Certification

NVIDIA DLI Certificate – Building RAG Agents with LLMs

NVIDIA Deep Learning Institute | August 2025
<https://learn.nvidia.com/certificates?id=Ve6uqyAkTVOBXXu8jmiatg>

NVIDIA DLI Certificate – Getting Started with AI on Jetson Nano

NVIDIA Deep Learning Institute | July 2025
<https://learn.nvidia.com/certificates?id=yIeYKJE3Tvu-AtXYMXFlxA#>

2025 H-Mobility Class: Autonomous Driving – Perception Track Completion

Hyundai NGV Co., Ltd. | June 2025
<https://edu.hyundai-ngv.com/mypage/certificate.jsp?cuid=1473720>

NVIDIA DLI Certificate – Building Conversational AI Applications

NVIDIA Deep Learning Institute | January 2024
<https://courses.nvidia.com/certificates/9dac6ad824cf4089b77359b4c5c34f96>

NVIDIA DLI Certificate – Building Transformer-Based Natural Language Processing Applications

NVIDIA Deep Learning Institute | January 2024
<https://courses.nvidia.com/certificates/181ca8a4ec5d4d40a3111ad4da8ba1ee>

NVIDIA DLI Certificate – Computer Vision for Industrial Inspection

NVIDIA Deep Learning Institute | January 2024
<https://courses.nvidia.com/certificates/ca11e3ca118442cb978b5575c28167b2>

Experience

Upstage AI Ambassador

Upstage

March 2026 – Now

DLI Certified Instructor (Building RAG Agents with LLMs)

NVIDIA DLI

February 2026 – Now

Undergraduate Researcher (LLM, Multi-Modal)

LaMI Lab, Daegu, DGIST

October 2025 – Now

SW Development Intern (AI Agent, RAG)

SEMES, SW center, Smart EQ

September 2025 – Now

Research Assistant, Undergraduate Intern

DIAG, Incheon, Yonsei University

March 2025 – August 2025

- ◆ Conducting research on the interdisciplinary nature of Human-Computer Interaction (HCI) researchers' identities, with a focus on how diverse academic backgrounds shape research approaches and contributions.
- ◆ Currently preparing a paper as second author, targeting submission to the ACM CHI Conference.

Research Assistant, Undergraduate Intern

DIAG, Daegu, DGIST

September 2023 – June 2024

- ◆ Contributed to the planning and communication of an AI-driven audit system under the supervision of the MSIT Audit Office.
- ◆ Augmented and analyzed linguistic corpus data as part of an NIA-funded project.
- ◆ Participated in a research project exploring the intersection of large language models (LLMs) and education, gaining hands-on experience in open coding of qualitative data.
- ◆ Reviewed key CHI papers and literature on HCI methodologies throughout the research process.
- ◆ Attended academic conferences and networking events, including HCI Korea 2024.

Project Manager, EdTech Simulation Platform

Quester, Daegu

April 2022 – August 2023

- ◆ Initiated and led the development of a Unity-based virtual experiment platform designed to support science education.
- ◆ Acted as the project manager, coordinating communication among developers, teachers, and external vendors throughout the development cycle.
- ◆ Oversaw real-world implementation, including demonstration sessions during teacher training programs hosted by universities and pilot trials in high schools.
- ◆ Drafted project proposals and managed R&D administrative tasks, gaining hands-on experience in project planning and operational execution.

Research Participation

Research Assistant

Dongduk Women's University / Funded by Korea Foundation for the Advancement of Science and Creativity

May 2023 – September 2023

Engaged in the planning of science simulation content based on AI and software technology.

Participated in designing learning scenarios and experimental frameworks for interactive simulations.

Research Assistant

Questor Co., Ltd. / Funded by KIAT (TIPS Program)

June 2023 – August 2023

Involved in the development of a commercial hand-tracking glove with world-class precision and tracking speed.

Responsible for prototyping support, system validation, and usability testing as part of a short-term R&D project.

Research Assistant

Questor Co., Ltd. / Funded by Korea Institute for Advancement of Technology (KIAT)

May 2023 – December 2023

Participated in an industry-academic collaborative research project titled "Performance Enhancement and Utilization of Hand Tracking Technology through Integration of Vision and IMU Sensor Data." Contributed to the development and testing of sensor fusion algorithms for enhanced real-time tracking.

Research Assistant

Questor Co., Ltd. / Funded by Korea Institute for Advancement of Technology (KIAT)

May 2023 – December 2023

Research Project (-ing)

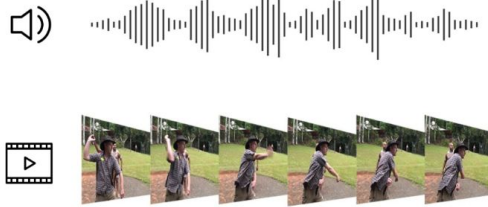

AVRTG (Audio Visual Robustness Temporal Grounding)

I am conducting this research as the first author. I am participating in it both as an undergraduate research student and as part of an internal university research project. My work focuses on robust audio-visual temporal grounding for omnimodal models. To this end, I am continuously working on generating synthetic data based on existing video datasets such as VGGSound and FineVideo, and using that data to train models.

Query and Task Definition

Please provide the output as Timestamp '**{start time}~{end time}**' containing the audio or video related to the query below.

Research Interest

AI model-based simulation

Recently, I developed a simulation system for social science research using the Nemotron-Personas-Korea dataset and Upstage's Solar model. I am now planning to study this system from an HCI perspective. To this end, I am collaborating with a senior Ph.D. student from an HCI research lab I previously worked with.

모니터를 누워서 보는 것이 눈 건강에 좋지 않을까 걱정되고, 현재 자취방이 좁아 스탠드가 차지하는 공간이 부담스럽다. 또한, 모니터가 없으면 스마트폰이나 태블릿을 그대로 사용할 수 있어 추가 비용을 지불할 필요성을 느끼지 못한다.

Positive drivers

• -

Top risks

- 공간 부족
- 눈 피로 우려
- 가격 부담
- 대체 수단 존재

질문하기

Programming Languages AI Cannot Solve

Can language models truly understand and solve problems in every programming language?

While taking a Programming Languages course, professor suggested an open-ended project: if we could design a programming language that AI could not solve, it would be reflected positively in our grade. Inspired by this challenge, I designed a new programming language whose syntax could be easily confused with Python, and successfully completed the project.

Although this idea is currently lower in priority due to my other research projects, I am planning to further develop it into a research project with support from the professor who taught the Programming Languages course. Specifically, I aim to use AI agents to generate new programming languages and their compilers, have models write code in those languages, and then evaluate their outputs through compiler-based testing. Through this process, I hope to analyze the linguistic structures and conditions under which models fail to solve problems.

Ultimately, this project aims to investigate how language models fail to generalize when faced with unfamiliar programming languages, and to systematically design new programming languages that are difficult for current models to solve.

Project Portfolio 2)

NAVER CONNECT SW CAMP

I served as the leader of a volunteer team that teaches AI to elementary schoolers. My role involved both designing the educational programs and managing our social media presence to spread the word. We successfully ran summer and winter camps at several different schools, and our hard work paid off when we were officially selected as an outstanding club.
